Profile

IT undergraduate at Pune Institute of Computer Technology (PICT) with strong fundamentals in Data Structures, OOP, and backend development. Seeking to leverage backend expertise in a startup environment, with a particular interest in integrating AI-driven workflows and tools to optimize web application performance and maintainability.

Skills

Programming Languages: C, C++, Java, JS

Backend Development: Node.js, Express.js, REST APIs

Frontend Development: HTML5, CSS3, Bootstrap

Databases: MongoDB, MySQL

AI-Assisted Development: Prompt Engineering for Code Optimization, Cursor, GitHub Copilot, ChatGPT.

Tools & Platforms: Git, Github, Postman, VS Code, Figma

Projects

Academic Activity Data Management Platform (In-House Project, PICT – IT Department)

Backend Developer

- Working on an internal web platform to collect and manage academic activity data from students, faculty, and Head of Department.
- Building backend logic and REST APIs while ensuring secure hosting and environment configuration for the IT Department.
- Utilizing **Cursor** and **GitHub Copilot** to accelerate development, refactor legacy code, and ensure high API documentation standards.
- Developing APIs to summarize and structure data required for NAAC accreditation.
- Tech Stack: Node.js, Express.js, MySQL

E-Commerce Backend Application (Personal Project – Ongoing)

- Building a backend system for an e-commerce platform to strengthen backend engineering skills.
- Implementing features like user authentication, product management, cart handling, and order APIs.
- Designing RESTful APIs and structuring MongoDB schemas.
- Focused on understanding real-world backend workflows and scalability concerns.
- Tech Stack: Node.js, Express.js, MongoDB

Club Activities and Certifications

- Design Team Member, **PICT ACM Student Chapter (PASC)**

Certifications: Understanding Design- NPTEL, Core Java- Udemy, Postman API Fundamentals- Postman
